

Steinbrecher Companies, Inc
can help get your place ready for
horses! Or we can help make it
better.

Here is how...

FROST FREE WATER HYDRANTS

Ever have a water hydrant or water line freeze up on you? We know this is **not** an *enjoyable* experience.

We install premium frost-free hydrants that are dependable year after year. We typically install Iowa Hydrant Model y34. We have found them to be good quality at an affordable price.

Depending on the soil conditions, our typical installation consists of digging 7 feet below grade, where we surround the shut off/drain valve with ¾" rock.

On top of this, we place a soil separation fabric. This product keeps the fine granules of dirt from sifting into the rock and prevents plugging – and freezing

RIDING ARENA'S

We help in creating your ideal riding arena.

The process begins with marking out the area you'd like to transform.

Then we ...

- Level the original soil
- Install a special soil separation fabric. This separation fabric doesn't allow the native soil (or rocks) to mix with the new base material.
 - The soil separation fabric also prevents weeds from coming through and allows you to enjoy your riding area with minimal upkeep.
- Then, we add the base material (usually a class 5 material).
- The top layer consists of nice, clean sand for the horses' comfort.

Your finished arena is one you'll enjoy for years with minimal up keep.

WATER DRINKERS

We can install quality Nelson Water drinkers in your barn or pasture. We have found this product to be a superior choice. Their systems is easy to maintain and can handle our rough MN winters.

We recommend putting a concrete pad around the drinker. By having this concrete pad around the drinker, it helps prevent your animals from standing on it, over it, or playing with it.

Steinbrecher Companies, Inc is
a FULL excavating company.
No job is too small.

When someone says the word
“Excavating” many things come to
mind. Some of our excavating
services are...

- New Construction/ Additions
(example: foundations)
- Sewer & Water Hook-ups
- Lot Clearings
- Soil Corrections
- Rough and Final Grades
- Erosion Control
- Septic Systems
 - Compliances
 - Design
 - Install
 - Repair and
maintenance

Are you ready to begin a project? Is
the project too big to do it yourself?

We provide safe and thorough
excavation services. When
considering excavating contractors,
you need someone who is
experienced. A ruptured water pipe
or cut utility line can be dangerous
and also cost thousands in repairs
and related damages. We always
call **Gopher One** before we dig.

Here is a list of the services we offer.

(Need something that you don't see here? Give us
a call. We can probably do it, if we can't we'll put
you in touch with someone who can.)

- Black Dirt
- Demolition
- Excavating
 - Additions / New
Construction
 - Erosion Control
 - Riding arena bases
 - Rough/ Final grade
 - Sewer and Water hook-ups
 - Soil Corrections
 - Water drinkers
 - Water hydrants
 - Water lines
- Landscaping
 - Lot Clearing
 - Retaining walls
 - Rough/ Final grade
- Roll-offs
- Septic Systems
 - Compliance
 - Design
 - Installation
 - Pumping
 - Repairs and Maintenance
- Shoreline Dredging
- Shoreline Restoration

Do you currently
have horses?

Do you want automatic
water drinkers?

Do you need a water line
installed to the barn or out
building? Or maybe just a
water hydrant?

WE CAN HELP!
